

Simon Heumos

Personal Details

I am finalizing my Ph.D. at the Quantitative Biology Center, Tübingen, with expertise in pangenomics and multiomics. I develop methods to analyze (pan)genomic variation, manage interdisciplinary projects, and create efficient tools like nf-core/pangenome for large-scale pangenomic analysis. I provide guidance to biomedical researchers on experimental design, data analysis, and multiomics integration. I also spearhead hackathons and workshops to foster innovation and knowledge-sharing within the bioinformatics community. Outside of work, I enjoy an active lifestyle and watching Sesame Street for a good laugh.

Employment

1 Jun. 2019 to 30 Jun. 2024 (5 years)

PhD student at the [Quantitative Biology Center \(QBiC\)](#) (Tübingen, Germany).

Reporting to Prof. Sven Nahnsen.

- Pangenome graph software & research:
 - Developed [nf-core/pangenome](#), a cluster-efficient pipeline for constructing pangenome graphs without bias or exclusion, improving execution speed by 2-3 ([Heumos et al. 2024, Bioinformatics](#)) ([nf-core/pangenome](#))
 - Co-developed ODGI, the de-facto standard for pangenome graph analysis ([Guarracino*, Heumos* et al. 2022, Bioinformatics](#)) ([ODGI](#))
 - Designed and co-developed PG-SGD, a pangenome graph layout algorithm that achieved 10x faster performance and reduced memory usage by 2x, cutting layout calculation time from over a week to one day for human pangenomes ([Heumos*, Guarracino* et al. 2024, Bioinformatics](#)) ([PG-SGD](#))
 - Major contributor to the PanGenome Graph Builder ([Garrison*, Guarracino*, Heumos et al. 2024, Nature Methods](#)) ([PGGB](#))
 - Evaluating pangenome graphs ([PGGE](#))
 - Supporting efforts for efficient pangenome graph indices ([Balaz et al. 2024, LATIN2024: Theoretical Informatics](#))
 - Contributed to a [Pangenome Graphs](#) review ([Eizenga et al. 2020, Annual Review of Genomics and Human Genetics](#))
 - As an associate member of the Human Pangenome Reference Consortium I contributed to building the first draft human pangenome reference ([Liao*, Asri*, Ebler* et al. 2023, Nature](#))

- Industry collaboration with Computomics GmbH on coding a pangenome browser [Pantograph](#). Development of pangenome graph browser using React, MobX-State-Tree, JavaScript ( [Genome Graph Browser](#)).
- Experimenting towards an interface between RDF/SPARQL and pangenome graphs together with Jerven Bollemann and Toshiyuki T. Yokoyama winning an ISMB 2020 [Best Poster Award: Semantic Variation Graphs: Ontologies for Pangenome Graphs](#)
- Multiomics analysis of the NCI-60 tumor cell panel ([Heumos*](#), [Dehn*](#) et al. 2022, [Cancer Cell International](#)) ( [QMSFC](#)):
 - Crawling and integrating multiomics data from resources like TCGA
 - Differential expression analysis of RNA-Seq data
 - Integrative analysis of transcriptomic microarray data (Affymetrix)
 - Curation, quality control, differential expression analysis of Fluorescence Activated Cell Sorting (FACS) data
 - Proteomics and phosphoproteomics data curation, and differential expression analysis
 - Reverse Phase Protein Array (RPPA) differential expression analysis
- Organizer, tutor, and chair of international hackathons and workshops
- Managing virtual machines and users in QBiC's deNBI cloud instances
- Organization of retreats
- Mentoring undergraduates
- Learning ONT sequencing and base calling at PANGAIA's Winter Wet Lab school

 1 Jun. 2017 to 30 May 2019 (2 years)

 Research assistant at the [Quantitative Biology Center \(QBiC\)](#) (Tübingen, Germany).

 Reporting to Dr. Stefan Czemmel

 [Employer's reference](#)

- Member of bioinformatics support and project management team (BioPM)
- Bridge function to the infrastructure and scientific software team
- Counseling of biomedical researchers on experimental design, data analysis, and paper writing
- FACS data analysis
- Proteomics LFQ data analysis
- Germline variants analyses on whole-genome sequencing (WGS) data: Quality control, read trimming and mapping, variant calling, and functional prediction
- Compilation of highly standardized and reproducible bioinformatics pipelines
- Excellent customer service when performing data processing and statistical analysis of big biomedical data
- Initiation and maintenance of a QBiC report template for analysis results
- Driving force behind standardized SOPs to improve QBiC's infrastructure
- Shaped research grant application at the Ministry for Economics and Energy (BMWi) titled

PANTOGRAPH acquiring 190,000€ for researching pangenome graph visualization

- Supervision of student projects
- After 1 year: Vice coordinator of the BioPM team

📅 1 Nov. 2016 to 31 May 2017 (7 months)

🏢 Master student at the [Computomics GmbH](#) (Tübingen, Germany)

👤 Reporting to Björn Geigle and Dr. Jörg Hagmann

📄 Thesis *Interactive Visualization of Genome Variation Graphs*

📊 Evaluation: 1.0

🏆 ISMB 2017 Best Poster Prize *Interactive pangenome visualization using variant graphs*

🔧 Tooling: Interactive full-stack web application with Node.js, nbind to make C++ VG accessible in JavaScript, Pug, D3, HTML, CSS (🔗 [AG](#))

📅 1 Jun. 2015 to 31 Sep. 2016 (1 year, 2 months)

🏢 Research student at the [Max Planck Institute for the Science of Human History](#) (Jena, Germany)

👤 Reporting to Dr. Alexander Herbig in the [Computational Pathogenomics](#) research group

- Development of bioinformatics programs for the analysis of paleogenetic NGS data (🔗 [GenConS](#))
(📄 [Fellows Yates et al. 2017, Scientific Reports](#))

📅 1 Sep. 2014 to 31 May 2015 (11 months)

🏢 Research student at the [Institute for Archaeological Sciences](#) (Tübingen, Germany)

👤 Reporting to Dr. Alexander Herbig in the Paleogenetics research group

- Performance of system administration tasks and development of bioinformatics programs for the analysis of paleogenetic NGS data

📅 1 Jul. 2014 to 30 Aug. 2014 (1 year, 1 month)

🏢 Research student at the [MFT Services](#) (Tübingen, Germany)

👤 Reporting to Dr. Günter Jäger in the Medical Genetics research group

- Analysis of RNA-Seq data

📅 1 Jun. 2013 to 31 Mar. 2014 (10 months)

🏢 Research student at the [Centre for Bioinformatics](#) (Tübingen, Germany)

👤 Reporting to Prof. Kay Nieselt in the Integrative Transcriptomics research group

- Analysis of RNA-Seq data and extension of an in-house developed Java tool for the analysis of RNA-Seq data

📅 1 Aug. 2010 to 31 Aug. 2010 (1 month)

📅 1 Aug. 2011 to 31 Aug. 2011 (1 month)

📅 1 Aug. 2012 to 31 Aug. 2012 (1 month)

🔧 Temporary shipping assistant at [WALDNER](#) (Wangen, Germany)

- Packaging small part materials and transporting them to the loading area

📅 1 Jul. 2009 to 31 Mar. 2010 (9 months)

 Alternative service as an ambulance man at the **DRK Rettungsdienst Bodensee-Oberschwaben gGmbH** (Ravensburg, Germany)

- Operations took place both in the ambulance and in the patient transport vehicle

 1 Feb. 2007 to 31 Jul. 2010 (3 years, 5 months)

 Side job at the **PEKANA Naturheilmittel GmbH** (Kisslegg, Germany)

- Assistant for office, shipping, and pharmaceutical packaging tasks

Education

 1 Jun. 2019 to 28 March. 2025

 PhD student at the **Quantitative Biology Center (QBiC)** (Tübingen, Germany).

 Reporting to Prof. Sven Nahnsen.

- Thesis *Computational methods for pangenomics and multiomics integration*

 1 May. 2014 to 30 May 2017

 MSc Bioinformatics at the **University of Tübingen** (Tübingen, Germany).

 [MSc certificate](#)

- Major fields:
 - NGS
 - RNA Biology
 - Java + JavaFX development
 - Data management in quantitative biology
- Thesis [Interactive Visualization of Genome Variation Graphs](#) at Computics GmbH: 1.0

 1 Oct. 2010 to 30 Apr 2014

 BSc Bioinformatics at the **University of Tübingen** (Tübingen, Germany).

 [BSc certificate](#)

- Major fields:
 - Functional programming with Scheme
 - Basics Bioinformatics
 - Java + JavaSwing development
 - Linux
- Thesis [TOPAS - TOolkit for Processing and Annotating Sequence data](#): 1.3

 1 Aug. 2000 to 30 Jun 2009

 Abitur (Wangen, Germany).

 [School certificate](#)
